PROFESSIONAL SUMMARY

Entry-level Software Developer and Cum Laude graduate with hands-on experience building full-stack and AI-powered applications using Flutter, Firebase, JavaScript, and REST APIs. Recognized for developing a laundry management system focused on operational efficiency and real-time order management.

WORK EXPERIENCE

Lifewood Data Tecnology- *Software Developer Intern (AI Integration)*

Jun- Dec 2025

- Engineered an AI-powered chatbot application using Gemini API integration to enhance user interaction and automated responses.
 - Developed responsive web interfaces utilizing HTML, CSS, JavaScript, and AI-assisted development tools to improve usability across devices.
 - Implemented backend services with Firebase Authentication and Firestore for secure data storage and real-time functionality.
 - Built a browser-based multi-game web platform featuring interactive gameplay and dynamic UI components to enhance user engagement.
 - Collaborated in rapid prototyping, debugging, and agile development workflows for real-world software applications.
-

PROJECTS

Laundry Management System (Capstone Project)

Full Stack Developer

- Developed a full-stack laundry management system using Flutter, Firebase, and REST APIs for laundry pickup, delivery, and order tracking.
- Integrated AI-powered chatbot support using Gemini API to improve customer interaction and inquiry handling.
- Designed responsive and intuitive interfaces for customers, riders, and administrators to improve user experience.
- Implemented secure authentication and real-time database management using Firebase services.
- Built rider assignment and delivery tracking features to streamline operational workflow and order management.

Posture Detection App

AI Application Developer

- Developed an AI-powered posture detection application using Google Teachable Machine and Python for real-time posture monitoring.
- Integrated webcam-based posture analysis with instant correction alerts to help reduce user strain.
- Optimized AI model responsiveness and detection accuracy for smoother real-time performance.
- Designed a simple and accessible interface focused on usability and user interaction.

POS System

Full-Stack Developer

- Collaborated with a team to develop a point-of-sale system during a hackathon under tight development deadlines.
- Built transaction handling and inventory management features to support basic business operations.
- Assisted in frontend development, backend integration, and rapid feature implementation.
- Applied communication, teamwork, and problem-solving skills to deliver a functional working prototype.

Multi-Game Web Application

Frontend Web Developer

- Created a browser-based multi-game platform using HTML, CSS, and JavaScript featuring multiple arcade-inspired mini-games.
 - Implemented responsive UI components, animations, and score tracking systems to improve user engagement.
 - Developed game logic and interactive mechanics focused on accessibility and smooth gameplay experience.
 - Optimized frontend performance across desktop and mobile screen sizes.
-

EDUCATION

Cebu Eastern College (2022-2026)

Bachelor of Science in Information Technology (Cum Laude)

SKILLS & AWARDS

- **Skills:** *JavaScript, Python, Java, Dart, HTML, CSS, Flutter, React, Firebase, Firestore, REST APIs, Git, GitHub, Vercel, VS Code Prompt Engineering, AI-Assisted Development, Responsive Web Design*
- **Awards:** *Cum Laude Graduate, Capstone of the Year Awardee — Laundry Management System, ProWeaver Prompt Quest Hackathon Participant/Awardee*
